

JetTrac

Public Guidance System

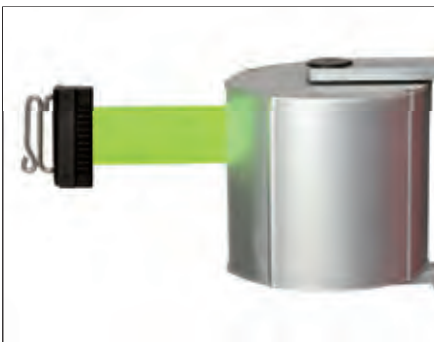

JetTrac supports airport staff in quickly and effectively securing airplanes during short ground handling times.

- >> Highly durable system from aluminum and stainless steel: developed for outdoor use
- >> Easy handling through a low barycentre and self-contained, easy moving wheels
- >> 20 metres webbing system including a centrifugal brake: If accidentally released, the brake will activate.
- >> Turnable belt mechanism which adapts to any direction and which highly reduces belt abrasion.
- >> Easy to maintain and flexible: facile change of components
- >> The tube features three longitudinal dovetail grooves which can be used to receive different accessories (e.g. chock storage, light wands).

Technical Data

| | | |
|--|--------------|---------------------|
| | Total Height | approx. 1006 mm |
| | Width bottom | approx. 530 mm |
| | Width above | approx. 530 mm |
| | Belt Length | 1 x 20 m / 2 x 20 m |
| | Weight | approx. 55 kg |

20 meters belt mechanism,
dedicated for outdoor use

Self-contained, easy moving wheels
